Details: Sound healing has been with us since the beginning of time. The Swiss-born scientists discovered that playing a violin bow on a metal plate full of sand would cause the sand to form unique patterns based on the octave of the bow, the length of the stroke and other factors. A Chinese physicist discovered that by projecting certain symbols and sounds to water caused the water to form beautiful crystals, restoring water to its original undifferentiated state. We are made of over 80 water. Imagine the impact our thoughts, our words, our environment does to us. Using kabbalistic technology we have decoded the sound waves of the kabbalistic 72 names of god. Like a tuning fork, The sounds awaken in us the power to undo our d.n.a. To remove stress, to get rid of addictions, to heal ourselves and others. The sounds on this cd help us to awaken the healer within. This is the first time using computer technology that these sounds have been made available to us. It's in understanding how sound impacts bone, blood, nerve endings and tissue. Kabbalistic sound healing technologies evoke brain states and systematic homeostasis, where it is believed that the body can heal and restore itself. It's not just sounds but actually beautiful pieces of music. They will fill your day with light. CD comes with meditation booklet. Inside you will find the 72 code images and written meditation for each code.
