It's a revealing sonic stew of all the hit songs, from the 60's to today, that are sung over the chords Aminor Gmajor and Fmajor. 5 MP3 Songs POP: Quirky, POP: Party Pop Details: The Song of Songs stitches together bits from top 40 hits that use the same three chords. Those being IV, V, and VI. In C major that is F, G, and Am. There are other even more common pop chord progressions, but I am drawn to this one I guess because of the particular set of songs it contains. From Aerosmith to Usher. Most of them charted in the 70's and especially 80's. There are some from the 60's, 90's and 00's and they keep coming. Before the sixties it seem chord progressions were a bit longer before repeating, but there are probably some older hits with SOS harmony that I don't know about. My list currently has 70 songs and it is always growing. Let me know if you would like a copy. The awesome cover art was done by ME (Matt Erceg). I sang all of the voices except a few which are sung by MC Kerkulay (Timothy Young). I had so much fun making this record and I think it really comes through.
