Testimonial Graphics Pro Having appealing graphics on your sales page simply is a must, if you want to make your website unique, build trust with your visitors, and boost your income. Not only should you use the power of stunning graphics to get people to press your order button, or sign up to your list, but you should also use graphics to show your visitors what customers think about your product or service with a great looking testimonial box. ... and thats where many fail... Let me do a little test. I want you to take a look at the two testimonial boxes below, and tell me which one makes the best impression... You probably looked longer at the second testimonial box, right? Its normal. The second testimonial box stands out. It shows professionalism. However, I still see many poorly designed sales pages containing ordinary table testimonial boxes. Remember, its a proven fact that attractive graphics increase trust, leading to more sales and Opt-In/Ezine subscriptions. So, why should you be left behind? Thats why I have created a set of ready-to-use testimonial boxes, that you can easily insert into your web pages with your favorite HTML program. All the image files come in .PSD format, so you can easily edit them in PhotoShop to your own liking.
