

Loop Unit - Pro Keyboard Loops - Street Science (wav/rex)

[DOWNLOAD HERE](#)

It goes without saying that if the beat/bass combination is the energy that drives the mix then its the melodic/harmonic content of the keys that gives any tracks its heart and soul. Think of Dres Still Dre without the piano and you get an idea of how important keys and synth's are in a track. This chunky collection of pro keyboard loops contains essential Hip Hop melodies and chord progressions for your collection with the classic sounds of pianos, Rhodes, organs, harpsichord and many other quality vintage instruments. That's not all, just about every professional high end modern keyboard on the market is represented here too in full effect. All obsessively recorded, sampled, chopped, looped and mixed by us. This is the genuine article no doubt! As well as the clean polished loops contained in this pack we also included a large selection of dirty, grimy loops for you artists who like that gritty street sound. Perfect for just about any track ranging from dark east coast bangas to chilled out story telling beats, this collection is a must for any serious Hip Hop producer or music arranger. *Fresh Club Synth Loops *Dark Atmospheric Mobb Deep Style Chords *Crunk & Dirty South Heavy Keyboard Loops *Soulful Piano Progressions *Funky Street Synth Loops *Up To Date Chart Ready Lead Lines *Korg, Nord & Yamaha Synth Sounds So there you have it, a fantastic, professional collection of brand new up-to-date street style keyboard and synth loops perfect for all Hip Hop, urban and music industry producers. Either download instantly using our ultrafast servers or choose the CD/DVD for next day delivery.
