Rooted in the mysterious all night trance rituals of the Pashupati Yoga sect that spread across India from 100 to 700 AD, their improvisational, immersive sonic field is a post-modern expression of the Yoga of Anahata-nad: in-the-moment spontaneously self-arising sound. Fusing live electronic voice processing of Devotional Trance Chanting with World Beat Percussion and Didgeridoo, they recreate the resonant acoustics, fervent longing and highly charged energy vortex of these potent trance rituals. Their intuitive, organic sound invokes a journey through the deepest dimensions of non-ordinary reality and Primal Yearning, infusing modern Trance Dance, Flow Movement

and Dynamic Whole Body Meditation with the living energies of Quantum Field Transformation.
