Save hundreds of dollars in design fees with this brand new collection of hundreds of premium quality internet marketing graphics! If you do any sort of marketing online, or you have a website of your own, you know that one of the biggest things that always comes up when ever you have a new site are website graphics. So to save you hundreds or thousands of dollars on custom graphic design fees, Ive put together a brand new collection of hundreds of premium web graphics that you can simply copy and paste into your websites and blogs, in minutes. These graphics are already pre-made and pre-formatted, and are already in a web ready format (PNG and JPEG). So it literally takes just a few minutes to stick them into your website. AND theyre really high quality and polished, so you WILL actually want to use them on your sites. Take a look at these graphics for yourself... As you can see, these are really professional graphics. They were all designed by a real graphics pro who charges up to \$100 an hour for custom work, so this is really high quality stuff (something that would cost you an arm and a leg to have custom created for you). The quality of these graphics is what makes this package different from most other similar packages out there. So even if you already have a graphics library, this will make a great addition. Another thing that makes this package special is that most of tehse graphics come in Transparent PNG format. Transparent PNG means that you can use the graphics element on any color background, not just white, and it will still look nice. So this gives you great flexibility with your color schemes. White background: Same button on color background (still looks good): Here is a closer look at all of these graphics, giving you a break down of everything you get, along with full size samples... All The Graphics That You Will Get: Blank Headers (in JPEG format). The headers come in 10 styles and in 10 colors for each style. Theyre all 900 pixels wide and can easily be resized to fit a smaller size. Blank Footers (in JPEG format). The footers come in 10 styles and in 10 colors for each style. Theyre all 900 pixels wide and can easily be resized to fit a smaller size. Call To Action Buttons (in transparent PNG format). These buttons come with 4 phrases: Get Instant Access, Add To Cart, Buy Now and Download Now. They also come in 4 colors. Attention Phrases (in transparent PNG format). These graphics are a perfect way to grab someones attention when you have a special offer, discount, bonuses, etc.. Price

Tags (in transparent PNG format). These price tags come in 4 different colors and in a variety of different price variations. You can see them all below... Stickers (in transparent PNG format). You can use these stickers as is or add them to your existing graphics. They come in 5 colors and in 10 phrases: 100 Free, Brand New, Limited Time Discount, Free Download, Free Offer, MRR Included, New Version, PLR Included, Resale Rights Included, Special Offer. Numbers (in transparent PNG format). Use these numbers to break down different modules, sections, bonuses, offers, etc.. They go from 1 to 9 and come in 5 different colors. Guarantee Signs (in transparent PNG format). These guarantee signs come in 10 different colors. Dollar Value Signs (in transparent PNG format). When you want to put a dollar value amount on one of your pieces of content, you can use one of these signs. They come in 19 different dollar values that you can see below. Bonus Signs (in transparent PNG format). Make your bonuses stand out with these bonus sign icons. These signs go from 1 - 9. Check Marks (in transparent PNG format). You get a check mark and an X mark in 7 colors each. Arrows (in transparent PNG format). These arrows are in 4 directions: up, down, left and right. Also in 4 colors and 5 sizes each. So thats 12 modules of professional graphics you can add to your websites and blogs instantly. But I want to add even more value to this package, so here are your extra bonus items... Your Bonuses... Empty Shapes (in Transparent PNG). These are empty shapes (without all the text) for all of the items in the 12 main modules above. So you can add your own call to action text to the buttons, add your own prices to the price stickers, etc.. You can use your favorite graphics program to edit these graphics (you do not need Photoshop). PSD Source Files For All The Graphics. If you do have Photoshop, Im also hooking you up with the layered PSD source files for all of the graphics in this package. You can edit all the text, change the colors, move things around, etc.. Create your own variations to fit your site exactly.
