Thought provoking acoustic folk-rock from Hawaii. Laid-back, emotional, and grounded in an ocean of melodies. 13 MP3 Songs FOLK: Folk Pop, ROCK: Folk Rock Details: Paradise Found Everybody has a certain sense of paradise: Gold sand, blue water and the setting sun. For Micah Wolf, paradise is as far as the front door. Hes fortunate enough to call Hawaii home. But for the rest of us less fortunate souls, Micah has been kind enough to recreate the melodic sounds of paradise on his debut album, the self-titled Micah Wolf. As an independent musician, Micah built the album from the ground up literally. He and long-time friend as well as band mate, Eric DeVine, constructed a studio to record and produce the music. Then Eric handcrafted the guitars, ukuleles and stand-up bass that feature on the album. As if that wasnt enough, the two then started their own record label, Blockplane Records, to distribute the CD. In the end, Micah Wolfs slice of paradise wasnt so much found as forged. With dedication, passion and the help of his friends, Micah has crafted an excellent album that is filled with the everyday beauty of life. It takes listeners on a personal journey through tough times and triumphs, to a place of tranquility. So if you find yourself landlocked or lonely, not to worry - paradise is as close as your stereo.
