Save Time & Money, and Boost Your Profits With This Ready Made Selection Of 18 Corner Peel Ad Graphics Which You Can Edit And Customize, Or Simply Plug In - As Is When Adding Peel Away Ads To Your Website! When I first started seeing peeling webpage ads on other peoples websites, I wondered how they managed to get the peel page effect to work? For a technophobe like me, it appeared pretty difficult to do, and I put off using them because I didnt want to spend countless hours trying to get a web page peel to work on my website. Then I came across Harris Fellman and Richard Osterudes Peel Away Ads package and saw that it included step-by-step video tutorials on how to add the corner peel ads to your website. I bit the bullet and decided to see just how hard it would be. To my pleasant surprise, it was incredibly simple! I created my first test page in under an hour - without any technical hiccups! All I had to do was modify one file in notepad, and add a small snippet of java script to the bottom of my webpage, et voil! The script worked beautifully. I got pretty excited! Alright, I confess... simple things can sometimes amuse me. Now all I had to do was create some peel away ad graphics to match my websites. I found a package that I could buy for \$37, but being a bit of a graphics person I wanted my own in Photoshop format so I could match them to my offers and have full editorial control. So I began creating my own peel ad graphics and noticed that I was starting to accumulate quite a collection of them. Then a light-bulb went off and it occurred to me that there would probably be others who could benefit from and use my corner peel graphics too? And so there you have it... Peel Ad Graphics were born! Ive included the Adobe Photoshop .psd source files for all of these Peel Away Graphics so that you can slice and dice the images, and edit the text to say whatever you like. But if you dont own Photoshop you can still overlay your own text onto the blank images using whatever software you wish to use, or you can use the peel images with the default text shown in the thumbnails above. Note: Peel Away Ads v2 is comprised of four different Web Page Peel Ad scripts: 1. Single Peel 2. Rotating Peel 3. Affiliate Peel 4. 4corners Peel The eighteen 500 x 500 pixel large corner peel away graphics included in this set are designed for top right hand corner Peel Away Ads (like the one seen at the top of this page). As such they can be used with the following Peel Away Ad scripts: 1. Single Peel 2. Rotating Peel 3. Affiliate Peel 4. Peel Away Ads v3 (not

included in my \$17 peel away ads offer) The 4corners Peel (as used at the top of our peel away ads homepage) requires a background image that is 800px wide x 600px high. As such, you would need to resize these corner page peel graphics in order to use them with the 4corners Peel script. However the corner peel ad shown at the top of this webpage is using the Peel Away Ads v3 script, and a 500 x 500px large peel image, the same size as all of the graphics included in this peel images package. The small corner peel page graphic images (75 x 75px) will work with all four Peel Away Ads scripts, albeit that the rotating animation within the gifs will only work with 4corners Peel. If using the Single Peel page script, you can still use them to display a static image small corner peel, or you can use the multi-colored Special Offer smallanim.swf (like I am using at the top of this page) which comes included with the script. Why use Peel Away Ads? Because corner webpage peel ads get results, thats why. Unlike popups, they are non-intrusive to your website visitors, and wont block what they are trying to read. Yet most will notice the animated curling webpage movement up at the top of the page. In fact, you can add the webpage curls to any of the four corners of your webpage with version 2 of the Peel Away Ads script. The small animated peel is sufficient to interest most visitors on your page enough so that they move their mouse up to the area of the small corner peel, which of course then causes the webpage to peel back and reveal the message that you want your visitors to see. Using An Attractive and Visually Appealing Large Corner Peel Graphic Will Heighten The Chance Of A Click-Thru To Your Offer! People love interaction, and indeed this is the cornerstone of the Web 2.0 phenomenon. I have tested peeling web page ads and Im convinced by my results that they are the way to go in most cases in place of popups. A nice popup still has its place in some situations, but in most cases a peel back webpage is less intrusive and more effective. So I highly recommend that you try Peel Away Ads with my graphics. If my results dont stack up for you, you are covered by my 8 Week Customer Satisfaction Guarantee on both my Peel Away Ads package, as well as my set of Peel Away Ads Graphics.
