And heard heard in the major motion picture "Narc" starring Ray Liotta and Jason Patric, the song "Mi Guajira" was especially redone at the music supervisors request to have a male voice singing the song in Spanish. Please, it's playing in the background as Patric and Liotta team us as partners in a caf so please watch for for it. I was especially proud to see the name of the group and our names in the credits at the end. What makes this band accessible and different is the layered "wall of sound" that incorporates a full Latin rhythm section of the best Los Angeles Salsa musicians, playing typical mambo, son, cha's and all other popular musical idioms enjoyed by Salsa dancers throughout the World. On top of that, we layer the song with an intelligent lyric and Pop sensibility. Guitar is played by former Geffen Records Artist Frank Garcia who also writes and produces the melody lines in conjunction with producer/creator Jack Gold. The finishing touches are come with the rhythmic background vocals that are sung in Spanish. World famous percussionist Richie Gajate-Garcia adds to the rhythmic "Tropical" sounds and the singer Gloria T (Half Colombian and half Irish) sounds sweet, hot and sexy in both English and Spanish. Give the Carpool a ride for authentic tropical sounds and popular familiar and contemporary music. 70 minutes and 15 songs make this one of the hottest buys available in the music world.
