

Party Atmos Medium Glass Ice Chink Sfx Sound Effect

[DOWNLOAD HERE](#)

This is the recording of a medium gathering in a small reverberant hall, with glasses or ice chinking. See my other files if you require other atmoses from the same location - something bigger and busier including other backgrounds, applause, a selection of atmoses and hubbubs and other spot FX such as a balloon popping. All files on sale by Sevenleaf SFX have been recorded by professionals and as such are royalty free. They are available for you to download as 16 bit 48kHz stereo wav files. Previews are low quality mp3 files with security watermark beeps. Purchased files are broadcast quality wavs without watermarking.
