

The Veil Vol 2 Five Classic Episodes

"The Veil", a 1950's pilot series introduced by and starring Boris Karloff, concerned itself with ghostly tales and psychic phenomena. Although it was never taken up as a full series by a major network it still was quite entertaining. It is worth watching because of Karloff's own unique acting style and also because of the topics covered. One gets the impression that if it had been given a run then "The Veil" would have developed into a long running series investigating topics so well covered by future shows such as "The Twilight Zone" and "The X Files". It is a short series that a public television company would find useful in running in order to capture for a time a loyal viewing audience interested in ghostly tales or psychic phenomena. One of its best shows was the one about Jack the Ripper which will certainly get its viewers once again reading up books on this topic. A series well worth watching
