Related styles: KIDS/FAMILY: Children's Pop, KIDS/FAMILY: General Children's Music People who are interested in Barenaked Ladies Jack Johnson should consider this download. Details: About the Project The music and lyrics in this album are designed to reconnect children to nature, create a sense of awe for the environment and teach them about the concept of biomimicry. Educators have long called for more creative and palatable approaches to raising awareness about environmental problems. Given the reality of the current ecological crisis, it is challenging to develop the emotional connection to the natural world that creates caring without instilling fear or hopelessness. Today's children need positive solutions and realistic tools, such as biomimicry, to address the environmental challenges that they will grow up with, and this album will help to inspire and motivate them to make a difference. The album can be used as an educational tool in both formal and non-formal educational settings. Curricula accompanying each song is available on our website Executive Producer: Bryony Schwan The Biomimicry Institute Produced by: Allison Miller Amy Martin Project Coordination: Cindy Gilbert All songs written by: Amy Martin Recording engineer: Michael Bongiorno Assistant engineer: Jon Miller Mixed by: Todd Sickafoose at Earycanal Mastered by: Alan Douches at West West Side Music Illustrations: Emily Harrington The Missoula Coyote Choir is: Winnie Lohof, Rosie Cerquone, Riley Slayden, Pema Baldwin, Megan Cady, Lance Fisher, Kessa Juda-Nelson, Katy Clay, Katie Reagan, Katie Kendall, Josh Hoskinson, Grace Slayden, Dylan Yonce, Cameron Kia Weix, Caleb Anderson, Ari Aagaard-Shively, Abby Krebsbach. The Missoula Coyote Choir was founded by Amy Martin in the summer of 2007. Ranging in age from 7 to 12 years old, the group strives to raise ecological awareness and build community through music. To identify soloists and learn more about these young singers, please visit AskThePlanetCD.org. Vocals: Ani DiFranco, Bruce Cockburn, Brandi Carlile, Dar Williams, Erin McKeown, Laura Love, Bill Harley, Bill Sims, Jr. What is Biomimicry? Biomimicry is the process of

learning from and then emulating Nature's genius to create more sustainable designs. Its studying a leaf to invent a better solar cell or studying an electric eel to make a better battery. Biomimicry introduces an era based not on what we can extract from the natural world, but what we can learn from it. Janine Benyus, author *Biomimicry: Innovation Inspired by Nature*. The Biomimicry Institute: The Biomimicry Institute is a nonprofit organization dedicated to nurturing and growing the global community of people learning from, emulating, and conserving life's genius to create a healthier and more sustainable planet. Biomimicry's rapid adoption and advancement are imperative over the next decade. Lyrics music 2007 Amy Martin 2009 The Biomimicry Institute
