Cindee Sings Vol 1 Part D Beautiful Female Vocal Loops Acid Loops - 24 bit files Part D contains:
Beautiful Female Vocal Harmonies between 2 and 6 parts each 90-94 bpm 83 files in 1 folder 89 megs To
hear samples and demo songs from this disc click here Cindee's Vol 1 consists of: Female vocal loops
sung by Cindee Noble. Tempos range from 70-160 bpm. The styles are soft rock, pop, ballad, jazzy, and
some dance/techno vocals with trippy rhythmic FX. Ad libs without words is the primary focus within each
genre, but there is a section of word phrases as well. Theres also a great section of female vocal
harmonies (84-94 bpm) with lots of useful variations to each theme that show off Cindees beautiful vocal
tones. All loops are acidized with the tempos and number of beats noted in the filenames. The keys were
purposely set at do not transpose since most programs do not transpose vocals well, and would be more
of a hindrance than a help if the keys were set to transpose as the song changes keys. These files work
better kept in their natural keys and can be transposed manually where applicable. To order on the loops
disc as 16 or 24 bit files or to hear lots of samples for each disc please visit playinmusic.com
