"A children's CD with new sound that parents will love, too. Music to compliment the book "Little Kisses" by Jolie Jones, available from Julie Andrews Collection/HarperCollins Publishers." 12 MP3 Songs  
KIDS/FAMILY: Children's Pop, JAZZ: Bossa Nova Details: This CD was written and performed to be a companion for the children's book, " Little Kisses". PRODUCED BY RICHARD BARONE A sweet little story getting rave reviews and part of the prestigious Julie Andrew's collection at Harper Collins. This is Jolie Jones' first book. Illustrated by the very talented Julie Downing. Meant for the ages of 3-6. Jolie Jones and Julie Downing create a tender, heartwarming story that honors the loving relationship between a young child and her very best friend with fur. Look what people have been saying about the book! "This is the sweetest book I have read in years. Every little girl needs little kisses and every little kiss needs a girl and I believe everybody needs this little book, young and old, male and female. When you read it, it will make you smile." -Maya Angelou "With its charming story, enchanting illustrations and gentle wisdom, Little Kisses is a feel-good book... sure to delight anyone who has a 'friend with fur'. I am so proud to present Jolie Jones' debut as an author in the Julie Andrews Collection. We will certainly hear more from her." -Julie Andrews Meet Bejinhos! Did you know that Bejinhos means little kisses in Brazil? Bejinhos and her Jolie like to go on walks up to the village and down to the bluffs so we can see all our friends. Jolie reminds Bejinhos to never accept treats from strangers, to cross the street carefully, and to stay in the yard. Can heremember that those are the rules? JOLIE JONES was barely a teenager when she burst into public view in magazine after magazine as the first African American supermodel to appear on the cover of Mademoiselle and in the pages of Seventeen. Acting soon followed, and so did singing. When motherhood intervened in the 70s, she embraced it with the same energy and enthusiasm she had applied to her career but, by the late 80s, her ever-active inner drive brought her back into the entertainment world via management and production-notably via two suburb albums by Brazilian singer-songwriter Ivan Lins. Somehow, Jolie also managed to find time to move into non-profit world. She was a President of a chapter of SANE (Citizens For A Sane Nuclear Policy) and actively involved in the Global Forum activities at the Earth Summit in Rio de Janeiro in 1992. Her concerns about the

environment-triggered in part by her sons Donovan and Sunny-led her to establish her own foundation, Take It Back, which produces videos, public service announcements and educational materials to raise awareness of the importance of recycling solid waste. With her children taking their first maiden flights away from the nest, Jolie decided to once again step out with acting and singing as a natural and logical path. How could it be otherwise with a father named Quincy Jones and a childhood surrounded by living legends such as Duke Ellington, Ray Charles, Sarah Vaughn, Peggy Lee and Frank Sinatra? She witnessed a world of limitless possibilities, one in which her father always told her, "If you can see it, you can be it." She resumed her studies with acclaimed acting coach Milton Katselas and continued her music and vocal training. After a brief trial run with her father, she made a full-scale musical debut in 1996 at the Jazz Bakery, in an invitation-only event hosted by her father and Oprah Winfrey. Later that summer, in a performance at the Hollywood Roosevelt CineGrill, she gave a performance that generated a review from the L.A. Times describing her "gift for singing with smooth, floating rhythms and an arching, lyrical sense of melody," which went on to say her interpretations "recall the articulate expressions of Nancy Wilson blended into the warm candor of Ella Fitzgerald." Now dipping into the world of children's literature, Jolie has written Little Kisses; part of the prestigious Julie Andrews Collection. A tender and heartwarming story that honors the loving relationship between a young child and her very best friend with fur, Bejinhos. It all began one year, in Washington at the Kennedy Center, when Jolie's father, Quincy Jones, was receiving a Kennedy Honor Award along with Julie Andrews and others. Here is where after sharing their passions, children's entertainment and education , particularly Jolie's major TV project "Twinklesworth". Julie invited her to write a children's book for her new imprint at Harper Collins Publishing, The Julie Andrews Collection. Looking forward to more on the creative front from the talented Jolie Jones.
