If you have a website where you're selling a product, but your hit counter has stagnated, and you aren't making any sales, even though your product is in demand, then it is about time you shift gears by letting an expert traffic producer show you how to get your hit counter spinning like a top in 15 minutes or less! Subject: Breaking News! Dear Friend, Can you answer these questions? Is your website productive? Are you really making a ton of money from your site? Do you have a product everybody would want but just can't sell it? Have you found other people in your industry doing well but not you? I always wondered this myself, considering why I was not making money. I couldn't figure out why my website wasn't producing sales. Sad feeling isn't it when your website is not productive? More importantly, why did you get your website up and running knowing your site may or may not work? Maybe it was because: To know you have a web presence of some kind Being able to hopefully make some kind of money like other people Being a success online Pride in knowing you did it you made money online Just to have a better way of life To pay some of the bills To have nice things Maybe you spent your last dollar on something you liked but realized you had no more money and complained about it. Maybe you are just sick of being broke and wanted to do more for yourself? What adds to the wound is that you have friends who are on the Internet and are making money hand over fist. Why are they so successful with their website and you can't? Wouldn't it be good to have a website that is not only getting a huge amount of traffic but is making a ton of money for you as well? I have a friend who put up his website and once day I saw his website stats. I was shocked when I saw the amount of hits he was getting per day. The numbers were lousy. Obviously, he was doing something wrong. Do you know what is even worse than what my friend was doing? It is that most of you people are in the same boat. You aren't doing the right thing and that is why your hit counter is just sitting there staring at you, waiting to turn. You may have bought books to help you learn to optimize your website for better ranking. You may even have hired someone to optimize your web pages for you. The result is not good. You wasted your money in books that didn't teach you anything. You wasted your money paying to

have your web pages optimized, only to see your ranking has not improved. So you need not... Blame Yourself For Your Misfortune! Do you know what is even more discouraging? Those books were written by someone who didn't even know how to optimize web pages. He just did the research and wrote the book. Most of the text is research material that is based on theory but was never tested. It really frustrates me when I see people spend needless money on something that is not going to help them. I can say this because at one time I was also doing the same thing. I tried to optimize web pages to get high ranking but failed. I tried every trick in the book to get traffic to my website but failed. Why did I keep failing? That is when I Discovered the Secret Method That Would Literally Pump Traffic to My Website When I applied this secret method to my own website, I could not believe my eyes. I literally saw my hit counter go from 100 hits (I just put the site up a week before) to 1000 hits in just 15 minutes. It was incredible. So could you imagine that if you applied this method to your website you could also get a huge amount of traffic pumping to your website within 15 minutes? I did it and so can you. In fact, I know several people who did use my secret method and told me how much their traffic increased. They were getting bombarded with not only huge amounts of traffic, but also requests for link exchanges. In order to get to this moment, I did a lot of research, performed tests, a lot of trial and error, until I finally came up with a secret method that will help anyone who has a website get traffic pumped to their website. Now I can make this secret method available to you. Is Your Website Getting Tons Of Traffic Think about this for a moment. When you get up each morning and log into your email do you get a lot of request for links? Or do you see a ton of sales recorded from your website? See if you can answer these questions: Do you love what you are doing with your website? Are you making a ton of money from what you are selling? Are you getting a ton of inbound links from all the traffic you are getting? Are you actually getting a lot more traffic than you did before? Do you see your hit counter spinning like a top? If your answer to any or all the above questions is a no, is it a wonder why you are not successful with your website? You may be thinking to yourself you know how your website is doing. You also may be thinking why you should listen to me. Who am I to talk about getting traffic to a website? If you have heard of me, I am not one to give BS to anyone. When I make a claim, I mean it. But if you have not heard from me, let me introduce myself. My name is [YOUR NAME HERE]. For quite some time I was involved in many ventures. I didn't do all that well. I did make a living but nothing to brag about. I started businesses online, only to fail them within a few months. One business I actually started online and it lasted two year. Unfortunately, that business eventually died. After

this period of failure, I spoke to several people who were doing what I was doing with their websites and here is what I found out: No strategy in place to grow their online business No idea how to get traffic to their website No idea or steps to optimize the site correctly for better traffic flow No inbound links and no strategy in place to get them After speaking to those who failed, I went after those who were successful to get a comparison. Here is what I found out: The owners of successful websites had a strategy they used that worked. They developed a template from their success and used this repeatedly when starting other businesses online. Once they learned what worked in getting traffic they used it consistently. They developed the right mindset and used it to their advantage. It was obvious to me once I did the research, the reasons for the failures and the successes. I also learned many secrets of how to get traffic to my website. Once I learned the secrets and applied them, I kept what worked and what didn't work, I discarded. Before I knew it, I had a proven strategy and used it on myself first, with tremendous results.

Unlimited Laser Targeted Leads in Any Niche You may not realize this but you can get unlimited number of laser targeted leads in any niche to your website, or any website you choose and generate a large number of inbound links. And what is really amazing about it is it isn't hard to do. It doesn't take a scientist to understand it. In fact, within the time it takes to read this letter, you could literally be seeing your hit counter fly. Did you ever see a hit counter move quickly? Yours will. My secret method will not only pump traffic to your website, no matter the niche market, but you will also get a huge amount of inbound links to boot. Hey, I see my bank account getting stuffed every day with hordes of cash. And it never stops. I am literally seeing thousands of dollars go into my bank account every week. Does this sound like something you want for you? Do you want to wake up each morning, check your bank account, and see thousands of dollars show up each day or at the end of each week? Think about this: Day after day of constant money flowing into your bank account Unlimited traffic just getting pumped to your website Having Google index your website and seeing untold amounts of inbound links show up Getting a ton of emails telling you that you got cash waiting to be picked up by PayPal What a dream right? No this can be your reality. It just takes a moment to apply what is in my secret method and you can't go wrong. And now I am making this available to the general public. What is it? A Five-Step Process What I have developed is a five-step process that will guarantee you will get a ton of traffic even as quickly as 15 minutes. You will learn all the secrets to pumping traffic to your website so you can get a ton of traffic and inbound links. No more struggling to get traffic. You will get more than you hoped for. My secret method is called The

Google Traffic Pump System. The Google Traffic Pump System is the ONLY system that will teach you how to get huge amounts of traffic and inbound links to your website and in less time it takes to read this entire letter. What my secret method will do is help you learn how to pump traffic to your website on a consistent basis, while also developing inbound links, of which Google loves. When Google indexes your site, they will notice your inbound links and will bump your website up in the search results resulting in higher page ranks! Here is an actual breakdown of what to expect: The first step in the traffic pumping system is to create a set of highly targeted keywords and phrases that apply to your product and niche. This step shows how this is done. In this section, you get to see exactly how to create this highly targeted list of keywords using free Google tools as well a few others that don't cost you a single penny! This is a very important step most online marketers tend to skip over quickly and suffer huge losses in profits. But you will learn how to avoid this mistake forcing you into profit from the start! This is what no one really knows how to do. In this step you will see how to construct traffic pumping keyword combinations formatted into powerful questions designed specifically to siphon massive traffic fast! In fact, many online marketers don't realize the power of questions! Strategically designed questions that contain your top keywords or keyword phrases can be extremely effective when it comes to driving massive traffic to your websites in record time! But, most importantly, these questions are also designed to attract laser targeted traffic of potential buyers that are looking for the exact solution your product or service can provide the solution for! If you do not have a Gmail account, this step will show you how to do it. This may seem like a very trivial step in this system, but in fact, it's the most important! This is where your traffic hub starts as well as where you will be receiving your new lead information. With this step you will learn how to get your traffic pump flowing. This step takes your new Gmail account to the next level. Many new-comers to online marketing don't realize how many free and VERY powerful tools that Google provides. Google Alerts are no exception. In this step you see how to setup your Google Alerts to pump laser targeted leads from the Google search index into your traffic funnel and ultimately to your web sites and/or services! With this step, you will be shown how to maximize the return on your results so the work you did previous will give you top results. In other words, this step ties it all together forming a constant gushing pump of new fresh targeted leads into your online business in mere minutes! Here is a visual representation of how this entire system works ... Not only do you get this step-by-step plan to help you get traffic pumping to your website, you also learn this: If a keyword term is appearing like crazy from your

alerts then the odds are very good that, not only are people posting the question online, but are using this exact keyword phrase. This means that link juice from these pages is very valuable. If you are not sure what link juice is, read the guide. It explains it. With the method you will learn how to re-pump your exit traffic back into your site with an alternative offer such as a discount or free download. Marketers who did this experienced an increase in website sales by as much as 325 in a few days. Learn how to do this. This method can really help your website pull in more money without sending more traffic to your websites. Read it to learn how.
