ELECTRONIC: Chill out, ELECTRONIC: Dub Show all album songs: Idyllic Life Songs Details: Hailing from The Netherlands, Nick Jeffrey van der Schilden and Peter Spaargaren form the trio called Easily Embarrassed. Idyllic Life is their debut CD showing what they're good at. Quality psychill among the lines of Shpongle and Ott, but comparing those artists would be a disgrace as they have their truly unique style. *** Easily Embarrassed is an electronic music group producing Psychill music. The band is based in the Netherlands and consists of brothers Nick van der Schilden and Jeffrey van der Schilden together with Peter Spaargaren. Each member of the group has made an interesting musical development in the past, and in July 2006 the three combined forces to summon Easily Embarrassed. After various well received digital EP releases on different netlabels, Easily Embarrassed kept their audience wanting more with their remix of Suspicious Minds on the Cosmotherapy album by Dream Lab. In February 2008, the group made an incredible debut with their album Idyllic Life. It brings an uplifting, melodic Psychill journey to another side of life. A wonderful blend of soothing ambient, disturbing atmospheres, glitched beats and emotional synth work.
