These are the new Timbaland & Danja sounds that currently have the radio & iPods on lock! This kit includes the crisp & punchy drums that make Tim & Danja run the clubs and charts! These sounds were recorded and designed by professional engineers using Pro Tools for the best sample quality available. These samples have been processed with Waves processing tools and SSL compressors for more impact and presence in your musical creations. Many drum libraries tend to have overused fx, have digital distortion and lack clarity as well as the natural sounds that some of our favorite producers have come to rely on to make hit after hit. Our samples are carefully picked, recorded, and fully analyzed to ensure that they are clear of any faults and have

more live sounding feel which is credited to the drum sets, sound modules, and samplers which are widely used by award winning producers. You will notice the difference once you apply these sounds to your musical works and you will not regret it. Kit includes 216 studio quality one shot audio samples which includes kicks, snares, hats, percussion, and effects. All samples are in 16bit WAV file format & are royalty free.
