

Car/auto/mechanic's Garage Workshop Atmos Air Compressor Sfx

[DOWNLOAD HERE](#)

This sound effect is a stereo recording from within a mechanic's garage / workshop. There is an air compressor running to add to the placement of the recording. Check out our other car SFX on sale by Sevenleaf SFX to layer together and create the sound of a busy mechanic's garage! These include a car ramp, a pneumatic wheel nut removal tool (that classic sound!), a rusty exhaust being dropped and a car that will not start. All files on sale by Sevenleaf SFX have been recorded by professionals and are available for you to download as 16 bit 48kHz stereo wav files. Previews are low quality mp3 files with security watermark beeps. Purchased files are broadcast quality wavs without watermarking.
