

Mp3 Matterhorn Project - 'muh!' ... And More

[DOWNLOAD HERE](#)

Swiss folklore comedy techno pop 15 MP3 Songs KIDS/FAMILY: Children's Pop, POP: Party Pop Details: "MUH!" (pronounced as "MOO!") by Matterhorn Project is unique in pop history. There are cows singing and bells tingling, yodelling and alpine horns, all supported by an infectious eighties disco-beat and a slightly spaced-out sense of humour. The track stormed the Swiss and international charts in 1985 and got known and loved for its sense of comedy and tongue-in-cheek citing of Swiss clichés. On this website Matterhorn Project offers you quicktime and free mp3 listening samples, quicktime-video and lots of background information. The first album of MATTERHORN PROJECT with the two top ten hits "MOO!" ("MUH!" in the original Swiss release) and "Yo-lollo-dih" is back again. Directly mastered from the 1985 original tapes of course, but in superb digital quality. Not only this - seven more bonus tracks come along on "MUH! ...and more". The extensive booklet shows charts positions, record sleeves, the original graphics of "Chilbi-Time", a japanese sleeve - this is a must-have collector's item! And what's more: children love the cow groove. Let's MOO! See what people write us about MUH! and Matterhorn Project: - We enjoy your music very much. We recently ordered MUH! and you were kind enough to send us a second copy when the first arrived sans disk. (Andy Ellington, Texas) - After a long search I have finally found the CD "Matterhorn Project - MUH! .. and more", it's so grrreatt. (Oliver Studer, Switzerland) - Look forward to receiving the album. I've waited 14 years, a little more won't hurt much. (Tony Valster, New Zealand)
