Producer Loops and Chimp Spanner are back with the final installment in the 'Ambient Metal Constructions' series. AMBIENT METAL CONSTRUCTIONS 3 features even more dulcet tones blended seamlessly with raging heavy metal guitars and drums. AMBIENT METAL CONSTRUCTIONS 3 was created by 'Chimp Spanner', an instrumental progressive rock project created by UK based multi instrumentalist and composer, Paul Ortiz. It combines the sounds of ultra low tuned modern metal with sweeping cinematic ambience. This new release features 'Construction Kits', which include a main mix and the broken-down elements. Everything is recorded at 130 BPM and in the key of 'B' so you can easily match loops. As a bonus you also get Miscellaneous Samples and Effects, Drum Fills and Patterns. To top it off, there are MIDI files included for much of the "digital" content including the drums and synthesizer parts. MIDI FILES: MIDI files have also been provided for the melodic loops (drums, leads, pads, ambiences, etc). Therefore, if you want to put these melodies and drums through your own synthesizers or plugins, then no problem, simply import the MIDI file into your sequencer then select your own synth or plugin as the output. SUMMARY: This pack weighs in at 1,03GB including all of the formats. It includes 24-bit Loops influenced by Dream Theatre, Toto, Brian Eno, Vangelis and many other legends. The pack is suitable for rock artists looking for some extra grit, as well as ambient, dance and soundtrack composers looking for an alternative edge to their sound.
