The soothing sound of Scottish Smallpipes combined with a relaxing water, wind and ocean sound backdrop, provide an amazing meditative soundscape for taking the tension out of the day. 10 MP3 Songs in this album (56:00) ! Related styles: WORLD: Celtic, NEW AGE: Celtic New Age Details: The Scottish Smallpipes are a close relative to the more popular Highland Pipes, but with a much softer, muted sound. Often called parlour pipes, because of their pleasing timbre, they are inherently relaxing. This recording presents a slightly "new age" approach by combining the pipes with an already soothing sound track of ocean, wind and other nature sounds. The melodies are old and new and conjure up a feeling of ancient times and a restful, peaceful state of mind.
