The Big House Blues Band offers a combination of talented and diversified musicians working to serve a blend of classic blues and blues-rock with a distinct sound that stands as big as a house! Their sound combines elements of ZZ Top, Muddy Waters, Gary Moore, Maria Muldaur and Eric Clapton with the Blues Brothers! Some of BHBBs members have collaborated musically for more than 20 years. The Big House Blues Band itself is the morphed result of a number of blues bands that were formed by Doug Houseman and Jimi Ray shortly after their meeting in 1986! The combination of musicianship and true friendship between the individual members of the group produces an incredible level of tightness in their music and a camaraderie between members - something rarely heard of in these days of "American Idol" and manufactured bands. The group is magically graced with a number of multi-musicians, opening a vast and nearly unlimited number of possibilities within the group as their CD We Knew Them When has proven. This CD has been added to WGVU-FM (West Michigan NPR) radios airplay list. Radio stations in Argentina, Brazil, France and Belgium have also requested and received copies of their CD! The group experienced their first Canadian airplay with this CD on CKIA-FM in Quebec June 2006. . . .
