You just spent the past few hours researching a topic for your next newsletter. Then you sat down and wrote out a killer article for your readers. You send it out to all of your subscribers, and what happens...? If you're lucky, some of those emails got to their inboxes... but statistics show that it's likely that that as much as 60 of your subscribers never got your newsletter because of spam filters. Then you face another problem for those who do read it, if it doesn't appear professional to them, they will delete it. All your hard work went into the trash and your subscribers loose their interest forever. Ezine Filter And Format Software Will Instantly Solve Of BOTH Of These Problems For You! Problem #1 - Spam Filters: Ezine Filter and Format Software will take your newsletter and filter out the words that the spam filters are looking for. No longer will you have to hit and miss guessing which words are allowed... just copy your newsletter into the software, and those words that will trigger those spam words will be gone forever. Your ezine will look great and get the attention it deserves. Your new Ezine Filter & Format software is super! No more worrying about using words that the filters eat up or problems with email displaying properly because I forgot to format a line correctly. This is real time saver. I especially like the filtering aspect because I hate trying to enter all those special characters in words that the filters hate.
