BOOST & JUMP START IMMUNITY, WELLNESS, & ENERGY "Dear Doc, All, My husband started coming down with a cold when we were out of town last weekend. He began taking some Zicam (homeopathic zinc) on Saturday but it didn't seem to be cutting it. When we got home Sunday he was miserable, sneezing, stuffy head, cool body temperature. It seemed like he was going to head straight into whatever illness this was. This was disconcerting since my husband has an intense work schedule. I grabbed my iPod with the SLB and looped a playlist I call Health Blast, which contains Bio-Sparkorama, Cell Function Stim, Viral Inhibitor Elixir and Heal Via Many Levels. He was at his computer and I told him to just let this run. A few hours later it was time for bed, and he said he was feeling a lot better. He slept that night with the iPod/SLB/Health Blast tracks on his nightstand, broadcasting away. He woke up on Monday morning good to go. No trace whatsoever of his cold. Another big thank you, Doc. Kat
