Basically, everything you need to create a professional, corporate look mini-site is there. You don't have to have a sleazy mini-site design anymore. But that's not all... We want give you options... Don't Worry! We provide you with options... Though using a mini-site template, as an online entrepreneur myself, I understand that you may want your mini-site to look different from other people's. So I provided you with options... Two Different Layouts Styles - With or Without Sidebar I know at times marketers just want a simple top-to-bottom layout without any distraction. This same mini site design is also available without the sidebar. In fact, you can toggle between the two easily, simply by applying the "full" class to , like this . Comes In Two Different Colors - Blue and Red Don't like the blue - use the red. The red is suitable for a fierce, aggressive look. And with the right background, you can also project a cuddly, lovable image. Use which ever you want according to your project. You can choose to use either of these color designs. Easy Styling with CSS I really thought through all the things that you may want to have when designing this mini-site template. First of all, , and are already styled. You can straight away use them for headlines and sub-headings. On top of that, using will simply brings up the nice blue text box, with a huge double quote in the background. Using will create a nice Johnson box for module details, bonuses or any other info. And with lists, instead of the boring square or dot, you can create a nice YES or NO list, where the bullets are either a cross image or a check image. Just use or There two easy ways to customize your mini-site. From the Photoshop PSD source file, you can edit the header by applying your own logo and text. Another method is by applying your own background graphic. Mighty Minisite was designed to allow the users to use any background graphic. Use a grunge theme to make a grunge website. Use a sky theme to make a happy website. Basically, it's all up to you. Separate Photoshop PSD Source Files Included I can just give you the main PSD source file, but I know that Photoshop can be a challenge for some. So I've split those PSD files into several pieces making it easier to use and to understand Instead of one big PSD file, you will get PSD like header.psd and orderbutton.psd. No messy slicing required. Mighty Minisite is only selling at \$29. And with that, you can three awesome bonuses to help you build and manage your mini-site better and faster. 1. Easy & Powerful PHP System This will make you life easier.

You'll know where everything is and it's easy to edit. You don't have to scribble through codes like a rat. 2. Comprehensive Guide eBook So that you really understand what Mighty Minisite can do. Will guide you through all that you need to know about Mighty Minisite. 3. Kickstart Video Tutorial When you need a hand-holding guide, the video will give it you. It's like I am there teaching you on your computer screen. Now, let me add to that... 4. 21 Stunning Logo Graphics for Your Header Yep, you don't have to use the shield logo you see in there. You can create your own. And if you don't want that, there are 10 more logo graphics to choose from. 5. 5 Background Images for 5 Different Look You know you can change the background and quickly bring to life a different new mini-site. And now, you have 5 more background designs for choose from. 6. iSeller Stickers and Order Buttons And as icing on the cake, here's a collection of 625 web graphics, consisting of sticker badges, order buttons and nice little icons.
