Numerology says that each number rules the humans nature and displays the effect. The name, birthplaces and date of birth are used for the calculations and predictions. It is strongly believed that the entire universe is composed of mathematical patterns and everything is expressed in numeric form. The numbers communicate universal vibrations. Pythagoras the Greek philosopher and mathematician was the man who postulated, that world is built upon numbers. Pythagoras is considered as The father of numerology. Numerology gives an insight to your personality and thus helps you overcome your weaknesses and face life positively. It is highly accurate and gives you a practical outlook of your life. It predicts the situations you may face in the future, thus preparing you for the worst. Numbers express more than we generally realize, and this form of divination helps us understand our cosmic vibrations and gives a deeper awareness about life.
