Pdf Metamorphosis .net 4 (1 Developer License)

[DOWNLOAD HERE](#)

PDF Metamorphosis .Net is a component to convert Text, RTF, XHTML and HTML to PDF with tables, images, fonts, colors and text formatting completely. Our tool is absolutely independent C# assembly, it doesn't require any additional components. Our component reads HTML and RTF documents directly converts it to PDF without Adobe Acrobat or MS Office. Functions: The PDF Metamorphosis .Net is just a class library. To deploy it you will need only two lines of code. By the instrumentality of our C# assembly you will add these functions into your application: - Convert string, url, or file HTML to PDF; - Convert string or file Text and RTF to PDF; - Split and merge PDF documents. Platform Independence: The PDF Metamorphosis requires only .Net 1.1 platform or above. Using the PDF Metamorphosis you can easily create any type of a 32-bit or 64-bit .NET application including ASP.NET, Web Services and WinForms. Our tool is Multi-Platform component, you may use it to build your application with Mono platform for Linux and Mac (mono-project.com). The component is completely created with managed C#. Requirements: Nothing special, only .Net 1.1 platform or higher. Supported File Formats: The Metamorphosisis can transform HTML, XHTML, RTF and Text documents into PDF documents. Technical Features: - Created with only pure C# - Absolutely standalone, you will need to include only "PdfMetamorphosis.dll" into your application - No other dependencies - Reads RTF, HTML files and writes PDF directly - Does not require installed Microsoft Office or Adobe Acrobat on the computer - Works on any .Net platform (1.1, 2.0, 3.0, 3.5 etc) - Works with Windows and even with Linux and Mac (thanks to Mono project mono-project.com) - Has great abilities to adjust an output PDF, see Methods and properties Developers can use the PDF Metamorphosis.Net with Visual Basic, C#, J#, ASP.NET, Delphi DotNet etc.
