"How Does Article Marketing Work?" The most important thing to know about article marketing is that it's one of the easiest ways to generate loads of free targeted traffic and free backlinks to your website. 1) The way article marketing

works is you write an article (or have written for you). It can be on any topic, usually best if it's related to your business and should be around 300 - 500 words long. 2) Once you have your article, you can submit it to article directory websites. There are literally thousands of article directories online and they are always looking for new content. When you submit your article, you can include a link back to your website, blog, video, twitter profile etc. at the bottom. This helps you because... Your article gets picked up by search engines and article directory readers (humans) and when they read it , they can click on your link which you placed in the article and go directly to your website. And because your article will stay live on those article directories forever, the traffic will keep coming and coming! Pretty crazy simple huh? But it really works. Submit Articles...By Hand??? No Thanks! The Old Way: The traditional way to submit articles was to visit each article directory website log in and submit your articles by hand...what a drag huh? You had to do each article submission one by one to each separate article directory. This was before the oceans broke up the land to form the continent we now live today...just joking... not that long ago... And when you have to submit to 10 directories, half your day was be gone doing boring submissions. As you can imagine, it is very time consuming to do it all by hand! Unleash the Potential of the Power Article Submitter Today! Using software turns boring laborous jobs into a few clicks and your done. It saves you time and thinking power so you can focus on other more important things during your day. You can get more things done for your business - and in the end, make more money! Ever wondered how some online marketers can be so successful and others struggle? The simple explanation is that they get more done. It's One of the secrets to success is to use the right tools. With the right tools you can get the job done faster and better. It's like having an extra (hundred) pair of hands! How about a simple analogy..... I have a friend who works long hot days as a carpenter. I had a look at his tool box one day and admired his collection of well used power tools. Do you think carpenters still use hand tools like hammers and chisels

these days? No, they need powerful cordless drills and high impact nail guns - power tools! Why? Because if they were still using hand tools, they would still be standing in the rain right now putting the roof on my house (they actually used power tools so it was finished this time last year :) The right tools get the job done faster and with far less effort. When we talk about submitting articles, software such as Power Article Submitter is the perfect tool for the job because it submits your articles to a handful of directories in an instant. My first reaction to the was: Anger. How dare something, anything, come along and show me how I have been wasting so many hours of the day by using what amounts to clearly inferior alternatives. One week on and I have gotten over the initial outrage that I had wasted so much time, and now I am just thrilled that I can save so much more time than I ever imagined possible. Excellent product, even a guru would be hard pressed to match it. -James Moore Revolutionary! This is the word that I feel best describes the . To be completely honest with you it makes existing competition seem like cheap knockoffs, and it goes above and beyond what it promises at every turn. Nothing, and I mean, nothing, that is around today can really even hold a candle to the sheer luminous brilliance that it is dripping with. In short: this is a tool by a master for both ordinary men and fellow masters too. -Sinclair Power Article Submitter Will Change The Way You Do Online Marketing Forever!
