Announcing The Brand New, 7 Part, Step By Step Video Course, That Shows You ... "How to Quickly and Easily Create Your Own Hot Selling Softwares...Even If You Don't Know A Single Line Of Code...Starting Today!" This isn't just another video product with theory...it's taken from true results from a successful software business owner! Dear Friend, FACT: Software has the highest perceived value, and it often sells like hot cakes. TRUE STORY: A few years ago, I was a programmer working for a company. While working for this company, I created a software product, that soon became a six figure success. However, the secret was this... while I created the 'idea' behind this software product, I actually hired a programmer from India to 'produce' it, for LESS than \$4,000...which includes ALL future updates! PROBLEM: Most people don't know how to create software and they don't know where to start. They are even afraid of going into this business, because they don't know how to turn their ideas into a software, or maintain it. However...you can finally get over this roadblock. DING! Introducing... Software Cash Generators! 7 Part Video Course This step by step, 7 part video series, takes you by the hand and shows you how to take a simple idea, and turn it into a simple, yet 'Hot Selling' Software Product. After watching this video series, you should easily be able to create a hot selling software product within 30 days or less....sometimes within 5-10 days! Here's a list of this 7 part video series in more detail Video#1: Introduction on Software Creation In this video, you will learn what tools you need to get started. You'll also learn how it all works, so you know what to expect before we even get started. Once you learn this, you can implement this business faster. You'll also be given a quick overview of what you'll be learning, in the rest of this video series. Video #2: What Software Should You Create? Video #1 shoes you how it all works. In this video, you'll learn how to figure out 'what' your software should be about. One key tip you will learn, is that software is generally created, because someone has problems. So, if you know what their problems are, then you can easily create a simple solution. That simple solution of course, is going to be your software. You'll also learn, simple tactics that give you software ideas...in less than 5 minutes! Video #3: Determining What the Software Does Once you have figured out what your software is going to be about, it's time to figure out EXACTLY what your software does. In other words, you'll want to know 'how it

works'. Luckily, if you know how to create a to do list, or even a grocery list, then creating software specifications, is a very easy thing to do. Video #4: Planning Your Software Once you have created your step by step 'to do list', you are going to need to turn it, into words a programmer is going to understand. Don't worry, you don't have to know code or anything. This is basically creating a step by step plan, so your programmer can create the software product that you want. In this video, you will also learn, what programming language you should use, and whether your software should be a 'web based' or 'windows based' product. Then you will be shown how to piece everything together, so that you have your step by step blueprint to getting your software created. Video #5: Creating Your Software Great, by now you should be ready to create your software. In this video, you will learn how to create your software. You'll also learn how to find smart and trustworthy programmers, that will do your job right. Not all programmers are good, but we'll show you some tricks to finding and spotting them, from a mile away. You'll also learn how to keep yourself safe, get lower costs...and much much more! Video #6: Testing and Maintaining Your Software Congratulations, by now you have probably created your software, so now it's time to test it out. In this video, you'll learn how to test your software and ensure that it has no bugs. The last thing you want to do, is release a software that has lots of bugs. It's ok if your software product doesn't have all the features it should have, and we'll talk about why, in this video. We will also show you how maintain your software. What about future costs...Updates...New Features? Don't worry, all that will be answered in this video. Video #7: BONUS - How to Recycle and Create Software At Lightning Speeds! There are lots of software products out there that have already been created. In this video you'll learn how to create software at super fast speeds, and own full rights to them. You may be asking, "How can I own rights to software products that have already been created?" You'd be surprised, there are tons of software out there like this, waiting for you to own them. But more on that in this video. So...with that said, grab this video series today, and learn how to start making even MORE money, by Creating your very own HOT SELLING Software Products Add this product to your cart now for only... ! \$10 P.S. This is one of the most risk-free ways to get started in your own successful software business. The investment required is virtually next to nothing, compared to what you will be receiving! P.P.S. This 7 part video series isn't just another one of those videos that are made from theory. You get to watch over the shoulder from a real successful software business owner! Tags: mrr
