

# Broadwave Streaming Audio Server

[DOWNLOAD HERE](#)

BroadWave is an audio streaming server. It is designed to broadcast any audio connected to the sound input on the PC. It will also stream audio recordings that are loaded as wav, mp3, wma, aiff and many other formats, bandwidth adjustment and serving over the Internet. Listeners do not need to install any special software to listen to a BroadWave webcast. BroadWave Streaming Audio Server specifications:
