Imagine the power of tens of thousands of other web sites being able to easily display your RSS feeds on their web sites for content. Think that will drive you some extra traffic? Wednesday 12:47pm From: Emmanuel Adegbola Dear Friend, How much is your time worth?? And how much of it do you spend on trying to get other sites to link to your site? The power of RSS feeds are a give-and-take, everyone knows that you can create massive web sites displaying other people's RSS feeds, which are great for driving search engine spiders. This works especially well if you are building large content sites for making money with programs such as Google AdSense or also for promoting affiliate programs. But there is also an often overlooked side of making money with RSS feeds, and that is your creating your own RSS feeds for displaying on other peoples web sites. But once you have taken the time to learn how to create your own RSS feeds. How do you get other people to display your RSS feeds on their web site? I used to spend hours and hours when I first found out about the power of displaying RSS feeds on other peoples web sites submitting my RSS feed links to five or 10 directories. So other people to find the links and use the content for their web sites. This worked great when I was just getting started. However we all the old saying that time is money, and if you consider the amount of time I used to spend submitting my feeds to the RSS directories, I was losing loads and it... I knew there had to be a better way considering all the technology that is available to us now. I considered building a web site where people could go and submit their RSS feeds and then that web site would disperse those feeds to all the RSS feed directory web sites automatically. But after thinking about it for a while I realize

this would be very complicated. Not only could build but also to use. That's when I came up with the idea for RSS announcer. I knew if I could automate the process of submitting your RSS to all the directories that matter, it would have to be easy to use? So simple, in fact, that my nine-year-old son can figure it out...
