It has never been easier to start your very own online business All you have to do is stick your name on the software below and you will instantly have a business you can call your own, earning you money while you sleep! Dear Fellow Internet Marketer, I'm sure you have heard it before: you must have your own product in order to make any real money on the internet All the biggest names in marketing sell their own products, and in those products they teach the importance of having your own product! And it's true, having your own product is great. It gives you the flexibility to make money a lot of different ways When it comes to making money with your own product, the possibilities are endless! Of course, the easiest and most profitable way to make money with your own product is to simply sell it on its own mini site. But it doesn't have to stop there ;-)"But There Is A Problem" Developing your own product takes weeks if not months of research plus a lot of effort, dedication, money and time. And that's just the beginning! Because once you are done creating your own product, you will then need to hire a copy writer to write your sales letter (\$1,500 and up) and hire a graphic designer to create your mini site (\$150 - \$400) and after you do all that you will have one product of your own, just one. And that's before you even start selling the product and see any profits from it! Or if you don't want to create your own product, you can do what the big names in internet marketing do: hire a programmer. But that is very expensive. You are looking at thousands of dollars for just one product and that is before you even hire a copy writer and graphic designer! "So What's The Solution?" It's really quite simple all you have to do is simply skip that whole time consuming, back breaking and expensive step of actually developing your own product. So you can start making money right away instead of just thinking about it while breaking your back trying to create a product yourself. And that is exactly what this letter is
