Auction Ads that really hit potential bidders between the eyes without ANY programming! There's no need for you to learn programming like I had to because Auction-O-Matic does all the hard work for you. In fact, because of this software there's no need for you to know anything about HTML or JavaScript at all. Auction-O-Matic * Works With All Online Auction Sites Including eBay * Automatically generates all the HTML and Javascript coding by itself! * Automatically changes background colors to your selection * Automatically displays up to 6 regular photo's which you have uploaded to the Internet. * Automatically creates interactive pop up windows for 6 more 'super-size' photo's you have uploaded to the Internet. * Automatically displays your company logo which you have uploaded to the Internet * Automatically aligns and frames your logo's and photo's to make them stand out. * Automatically changes the paragraph alignment, font colors, font faces, font cases for every area of your listing. * Automatically "copies" all of the code generated to your computers clip board so all you need to do is "paste" the code into eBay (or any other online auction site) * Automatically allows to you to preview your finished advert before submission in a browser window so you can check everything looks just right.
