Ip2ip Pop Mail Blaster

Your ad sent directly to millions of peoples desktop computer screens! The messages that IP2IP Software sends are not considered spam! IP2IP Software is a feature-rich direct advertising program designed to deliver your messages instantly to MILLIONS of Windows 2000, XP, and NT desktops with the single click of a button. Each successful broadcast displays a window on the recipient's desktop displaying your message. Unlike e-mail, there is no need for the user to open your message, or have any kind of program open. These messages will display on the screen of 95 of all computer users prominently above every window. IP2IP Software is Revolutionary Advertising at it's best! Sure, our IP2IP Software offers an almost unlimited number of possible leads for your company. We also include a database of billions of IP addresses to which you can broadcast your messages to. E-mail lists containing the same number of addresses would cost a thousand times the price of this product. In addition, it doesn't limit the number of messages you can send out. So once you purchase the IP2IP software, you can literally send out millions of advertising messages every day! Make BIG Money Providing a Service to your customers! You may have seen other similar services charge you for the number of messages you broadcast! $100.00 for 300,000 Ads, etc. With this fact in mind, you start generating a positive return on investment (ROI) only after a few broadcasts using our product, you can even make big money providing this service to your customers. Also in our latest version we optimized algorithms for best speed. Now you can set the number of threads yourself, depending of your connection speed! What is the size of the software program! The IP2IP Software is a normal 256K application and can be used on Windows 2000, XP, and NT desktops. We have included a screen shot below of the software interface. What are some of the IP2IP Software features? IP2IP Software uses built-in Microsoft technology to deliver your message directly to desktops without the need of a web browser. IP2IP Software can be used to communicate with customers or potential customers in real-time. E-mail can take days to be delivered and received. Each successful broadcast sent indicates that your message appeared on your recipients screen. That's equivalent to a banner ad click-through! IP2IP Software comes built in with a large database of built-in IP ranges that you may send your communication to. Are the messages thatIP2IP Software sends

considered to be Spam, and therefore illegal? No, the messages that IP2IP Software sends are not considered Spam. IP2IP Software uses built in Microsoft Windows technology to display a message onto a recipient's desktop. These kind of messages are useful when trying to communicate important information to multiple users. These messages do not use e-mail addresses or e-mail servers of any kind, and are broadcast directly over the Internet. What does the advertising messages look like? See the Screenshot above This is an example of what a message looks like when it is displayed instantly on the recipients computer. This is an "actual screenshot" sample. However, every message can be customized the way you want and goes instantly to MILLIONS of prospects! How long can the advertising messages be? The message can be up to 800 characters in length, which is about 10 lines of ad space and the website URL OR phone number for them to call (like a 800 or 900 number). What are the system requirements? IP2IP Software will only work on Windows 2000, Windows NT and Windows XP/ME at this time.
