Today you can have access to my tried and true methods for generating big profits as close to overnight as Possible with my buy low sell high method. From: FIRSTNAME LASTNAME Tuesday 11:06 AM Dear Friend, I've been selling digital products on websites for many years now, there is a ton of profit in online marketing if you know what you are doing. I've always enjoyed marketing products online but lately things have been a little bit slow, and I have not been selling nearly the volume of e-books and software that I used to. I knew if I was going to continue to keep my bills paid on time I needed to figure out something new fast. Many years ago I used to sell websites on eBay, and I did well at but there was so much competition and very few buyers. It finally got to the point where my regular websites were making me more money than I could ever make on eBay selling websites, so I gave up selling websites and stuck to my online marketing. All that changed about six months ago when I figured out a new strategy for selling websites. It started out simply enough I just had an old website that I was no longer using actively so I decided to sell it. A friend of mine named Mark, told me about a website that he was using to get rid of old domain names and websites he was no longer using, that site is called Flippa.com Mark told me that he was getting five times the amount of money used to get on eBay for his websites and that I should give it a try. I ran over to the site and after seeing how easy it was to get a listing active I posted my first website for sale and had sold within three days. It went so smoothly that I decided to try to unload some of the other old websites that I had in

my portfolio. I listed three more sites, and Bam just like that they were gone within four days with very very little work. Now keep in mind these were old websites that I was no longer actively using so they were sitting worthless on my server. This was like found money for me, money that I certainly wouldn't have had if I just let the domain names expire and then deleted the site for my server as I had planned. The craziest part of all this was that the websites I had just sold made me almost double the profit that I would make in a normal week of selling e-books and software. Of course it doesn't take a genius to figure out that I needed to do more of this, and I needed to do it fast. I felt like I had just invented sliced bread, however in reality I hadn't, there were lots of other people selling websites on this Flippa as well. But again, since my ebook sales and software sales were a little bit down due to the poor economy, what I made in that first week of flipping websites doubled my regular income. My first thoughts went away from my normal line of business which is creating another product, to how the heck can I find more websites to flip. I seriously started thinking of selling some of my longest term and most highly profitable websites, I was ready to sell the farm after seeing how much money could be made. Now obviously I didn't want to sell my main websites that I had spent years developing, but I did know that I wanted to get involved in this much more so I had a little bit of a dilemma to figure out. Where the heck can I find more websites that I can sell for the huge profits that I had just realized? Then It Hit Me... After thinking about it for a few days I knew I had definitely come up with the answer that could quite possibly make me rich. Forget about all the time that I spend writing my own e-books and having software programs developed to sell to my customer base, I was hot to start flipping websites full-time. I figured out a few different sources to come up with an endless supply of websites that I could buy low and sell high. I didn't even have to build the websites myself!
