

Automatic Bonus Delivery Plugin With Rights

[DOWNLOAD HERE](#)

Automatic Bonus Delivery Plugin will automate the process of delivering a bonus for purchasing a Clickbank product. I used to have to check my emails for people requesting bonuses, now I set the bonus product up with the plugin, which takes about fifteen minutes, and I'm done. The plugin takes care of the rest. Now when a customer purchases through my affiliate link, all they have to do is paste their Clickbank receipt # and the plugin delivers the bonus. If you are affiliate marketing, this plugin is a must. If you purchase this product from me you will also receive a copy of one of my other products called Best List Building Blueprint. All you will have to do is join my list, shoot me a message and I'll get you the download link or send it to you. This product is a video course that shows you over the shoulder how to do everything to create an online business. There is no aspect of internet marketing left out of these videos plus resell rights to the whole lot. This is worth more than any product I have available and I could charge \$197 or more for the resell rights to this product alone. Just the sales templates, PLR giveaway reports and autoresponder follow up message templates are worth more than the cost of the Automatic Bonus Delivery Plugin.
