MAGIC MUSHROOMS INDUCE POSITIVE PERSONALITY CHANGES?

healthland.time.com/2011/10/03/want-to-feel-younger-more-open-magic-mushrooms-trigger-lasting-personality-change/ ----- Experience body tingling and fizzing sensations associated with the positive body high. The Magic Mushroom Frequency series attempts to emulate various properties and states often reported by users of magic mushrooms, with the added benefit of the frequencies delivering only the positives and none of the negatives of the actual thing (this is the goal). Each different Magic Mushroom frequency delivers a particular sensorial, experiential 'part' of the psychedelic trip, which literally allows the user to pick exactly what sort of 'trip' they wish to have. For example, MAGIC MUSHROOM HAPPY LAUGHS.mp3 delivers the frequency intended to induce a state of joy, silliness, goofiness, playfulness, a sense of expanded awareness and over all well being. Shorter exposure play time may yield; sensory distortions, warping of surfaces, shape suggestion, color variations. Intense colors not previously experienced, repetitive geometric shapes. Higher exposure play time may cause intense distortions of sensory perceptions, i.e. synesthesia or awareness of extra spatial or temporal dimensions. Possible visual hallucinations, radically altered states of consciousness, pleasurable and insightful. Possible but mild and infrequent feelings of anxiety or revulsion. Additional possible effects may include: open, closed eye visualizations, euphoria, dream-like states, laughter and general psychedelic experience. Discontinue use immediately if mild symptoms of the following occur; anxiety, racing heart beat, dizziness, diarrhea, vomiting and headache. Although note, traditional Native-American or Shaman ceremonies as it is considered cleansing consider this to be cleansing in nature (purging). Sharpen psychedelic FOCUS, hyper-accelerate into and beyond the focused thoughts in the mind, allowing for possible deep insights and flashes to 'pop' into being spontaneously! See full description for unique profile info. The Magic Mushroom Frequency series attempts to emulate various properties and states often reported by users of magic mushrooms, with the added benefit of the frequencies delivering only the positives and none of the negatives of the actual thing (this is the goal). Higher exposure play time may cause intense distortions of sensory perceptions, i.e. synesthesia or awareness of extra spatial or

temporal dimensions. Induce a state of joy, silliness, goofiness, playfulness, a sense of expanded awareness and overall well-being. See full description for unique profile info. The Magic Mushroom Frequency series attempts to emulate various properties and states often reported by users of magic mushrooms, with the added benefit of the frequencies delivering only the positives and none of the negatives of the actual thing (this is the goal). Go deep into the interior of self-reflection, explore the vistas of your inner terrain. The Magic Mushroom Frequency series attempts to emulate various properties and states often reported by users of magic mushrooms, with the added benefit of the frequencies delivering only the positives and none of the negatives of the actual thing (this is the goal).
