An Open Letter To Anyone Who Is Serious About Making Money Online... "Who Else Wants To Discover The Secrets Of Highly Successful Information Marketers In Growing A Virtually Content Rich Empire Of Money Making Sites... & How To Have Quality Content On Demand Almost Overnight!" SHOCKING TRUTH REVEALED! Why Only 5 Of The Information Marketers Are Making All The Money While The Rest Of The 95 Are Struggling To Make A Few Dollars... And The Difference Is Found In Only 2 Words... (if this sounds anything like then read on) Dear Infopreneur, Times are changing. In 2008, the media announced that countries worldwide were going through a period of recession and financial crisis worldwide. This was the first time in a long time since the major financial crisis happened to many countries in South East Asia in 1997. The International Labour Organization forecasted that at least 20 million jobs will have been lost by the end of 2009 due to the financial crisis - mostly in construction, real estate, financial services, and the automobile sector - bringing global unemployment above 200 million for the first time. SHOCKING... isn't it? "As Recession Hits The World Hard, More And More People Realize..." ... That job security is now only a dream. The search to replace their lost jobs and supplement their income in tough times have introduced hundreds of thousands of people to the possibility of making money online. If I guess correctly, you're taking a stab at marketing online right now because you are motivated to look for ways to supplement your income or leave the comfort zone of job security (because everybody already knows that job security is but an illusion). And I have a sneaky suspicion that the reason you're in the Information Business now is because you have been sold the idea that you can make a lot of easy money online without having to work, and automate the business to pull in the bills for you month-in, month-out while you laze away. Now while it is very, humanly possible to live the freedom 'push button' lifestyle of an Infopreneur, this holds true only for a small fraction of online business owners. What about the rest? In other words, only a small percentage of individuals in this business are already successful, whereas the rest of the general population are still stuck in Gear 1 in their business! SHOCKING... isn't it? "Out Of The Stove And Into The Frying Pan..." I don't mean to sound obnoxious but the reality is really harsh. And this is why I hope you read this letter with an open mind. Because in spite

of what seems to be terrible odds, I still think that everyone deserves an equal chance at success - and I believe ANYONE can do it too. You see, making money in the Information Business isn't as hard as you think it should be. "Isn't as hard? Then why are only very few making it big time? Didn't you just say it yourself?" Let me explain. This is still is the best business to be in for many people. It beats slaving away at a 9 to 5 job, you save yourself from a lot of time and money wasted on traveling back and fro from your workplace. And what other types of business can you think of that can rival the flexibility and mobility of doing business purely online? Yet the thing is, the reason why successful Information Marketers are successful is because, they simply have better access to creating better information. "The One With The Best Information Is The Wealthiest..." If you read any book in the Rich Dad series from Robert Kiyosaki, you will learn that we are now in the Information Age - and wealth belongs to those with the timeliest information. This holds true in marketing online as an Infopreneur. And it boils down to only 2 things... 1. Quality 2. Velocity Believe it or not, these two alone are the factors that put a razor edge separation between the Infopreneur Gurus and the rest who are struggling in their Information Business. If you're not convinced then I'd like to throw you a short quiz: \* Jeff Walker created Product Launch Formula and Frank Kern created the Mass Control course. They know something many didn't know, and have now produced many millionaires and success stories of other scales. \* David Deangelo of Double Your Dating. He knows every trick in his own book when it comes to picking up women, and he knows something many men don't know about dating. He had since been responsible for hundreds of once hopeless romantics now enjoying success and happiness with women. And they owe it all to his teachings. \* The infamous self improvement course of the century - The Secret. Bob Proctor had taught thousands of people from every background and career about the Law of Attraction. What Do These People Have In Common? You can give any answers like "they know the right people", "they have the money", "they have the title" and so on. And while these answers are correct, the root simply comes from the ability to produce content on demand, and at a high velocity. Many successful Information Marketers like them know that it's almost impossible to be rich with only one product, and also need more content constantly to get themselves established as experts. For one reason... "New Information Doubles Every 18 Months...!" That being said, information and content made just a year ago can quickly be obsolete by today. There is always new information being made every day that the amount doubles virtually every 1.5 years. The experts know this - they know there's a life span to the information they put out in most cases

(with the exception of timeless content like self improvement). And they also see this as a good opportunity to keep on selling and make more money. The problem is that as always, the ones who are ignorant of this will be left out to lose, and share the crumbs of the pie with the 95 of the others. Now What If... You can start churning your own content on demand without writing your own You DON'T have to be an expert today to begin with (I can show you how to become one quickly) You can tap into multiple profit centers using the same content you generate And Do It All Overnight? "Introducing Content Creation Strategies..." Flash Videos, MP3 Audios and PDF Transcripts to the entire course - instant download after purchase! Finally... Now Anyone Can Generate High Quality Content On Demand In Any Hot Niche Overnight! After several months of keeping these techniques to generating content on the fly to myself (almost selfishly), I decided to to reveal these techniques on the account that if I can help you do just that, I would want to add your success story to my collection. Unfortunately, I don't have the luxury of time of teaching people how to do this on a one-on-one basis (yeah I'm too busy building another website... I just can't stop!) so I came up with the next best thing: I have created this series of audios and videos so that you too can 'pick' my brain... .. and what took me months to learn, you can now learn in just one hour! Living up to the promise of 'overnight' content, each of the techniques I reveal in my videos are: Practical - these are NOT theories; I made especially sure that all of these techniques lead to easy content creation so whichever method you choose that you feel works the best for you, it is something that you carry out. Quick to implement - This is also another criteria when divulging the secret methods I use to creating content in the same day. The techniques can be carried out in quick succession - to the tune of possibly doing it overnight. DISCLAIMER: Although I think the average person can do it, I am aware that people's learning pace differ so the slow learners may take longer. At the most, it may take you a few days but as long as you have basic computer skills and a commitment to learn my content creation secrets, I don't see why it's not possible to do it even overnight! Not 'rocket scientist' material - nothing totally 'out of the world'. Simplicity is the best and I keep everything as layman as possible. My main objective in this course is to communicate the methods to you so you can absorb and apply them right after you go through my course. I believe this can revolutionize the way the average Infopreneur can get quality content at record speed and you don't have to necessarily implement every single method I discuss. In fact, if you stick to 2 or 3 methods you will see amplified results. But for the luxury of choices, I'll present the entire gamut... Module #1: Secrets to Creating Profitable Content on Demand -- Overview

The first module is dedicated to introducing you to a world of possibilities with quick draw content creation techniques. To be able to master any content creation technique at will, you need to exhibit an open mind for endless opportunities. You Can Expect To Learn: What constitutes QUALITY content? There are different rules to deciding what's QUALITY for the content you produce, whether you're creating an Information Product, doing Article Marketing or spawning Free Reports. An overview on the 8 different methods to generating content on the fly (which is covered in detail in Modules 2, 3 and 4) Content Creation Redefined - the source of struggle that many starting Infopreneurs are facing today is because of their poor understanding and regards to the fundamentals and responsibility about circulating information on the Internet. I will redefine Content Creation to you so you will get a clearer vision on how to pursue your Information Business. Module #2: Profitable DIY Content Creation Tactics The second Module is highly recommended for anyone who is just starting out but on a low budget, but have time to commit to learning this new mastery. This is also recommended for anyone who prefer to be in full control of everything they produce and prioritize uniqueness. You Will Learn: How to be an Expert in your niche quickly and for under \$100 - if you don't consider yourself knowledgeable in anything or had been living life as a 'jack of all trades' this will now be the least of your concern. How to gain the confidence of attaining Expert Status - the SHOCKING but pleasantly SIMPLE truth about being an authority figure. When you find out how easy it is to get a strong following of fans and people who look up to you as the 'go to' guy, you might just want to knock your head against the wall! (it really is THAT simple that you probably just didn't think of it) 3 different ways to producing your own content overnight - this doesn't involve weeks of research and writing an E-Book. A super fast way to creating your own content in 15 minutes to 1 hour! This is the same method I used to create this same course, so I want you to know that I DO walk my talk. The secret to high ticket product creation now done in just hours! When people think of creating high ticket products they normally would perceive that a lot of work must strictly be involved. This couldn't be any further from the truth. Your customers have little concern about how long you take to make the product, as long as you deliver it. So cut the chase with this technique that has helped created Info Millionaires! Module #3: Mass Information with Pre-Made Content If you want a jumpstart and skip niche marketing research then there's no easier way than what I show you in this particular Module. You Will Learn: 2 special ways to get existing "pre made" content - legally, ethically and highly profitable! (NO this is NOT plagiarism; I strongly don't condone that practice for obvious moral reasons...) but these ways

are safe to use - yes there are content out there that allows you to make use of them as your own! The vault of content which is the source of 15 of the books being produced in the world today, and created more modern Information Millionaires! A newly introduced method to the Internet Marketing arena in the early 2000's - this practice had been going on for almost a hundred years in the Industry Age, but this practice had just crept into the Information Marketing business and find out the same secret several Internet Marketers use to build 5 figure and 6 figure Online Empires on! Module #4: Leveraging On Other Peoples Content Easily, Ethically and Legally Designed for the lazy and busy guys, who says you have to necessarily write on your own? And who says you have to be a reporter on CNN to be the first to know? There's a gold mine of strategies in this Module and if you don't have the luxury of time, or don't consider yourself an insider in the loop in your niche, find out how to get other people to willingly do the content for you - more often free to low cost at the most! You Will Learn: How To Be The First To Know - if you fancy running websites on trends, fashions, fads, and time sensitive news - like football scores, games, new TV series, and more - then find out how you can get the timeliest content even if you're just the average person! REAL LIFE WEBSITES that are using this technique to get content for their own sites! They don't own the content but could publish the news as soon as it's hot off the press without having direct links to the media. Yet they're making easily tens of thousands of dollars a month, and are some of the most visited sites in their niche! How to get other people to willingly write for you - if your time is worth more than money than there's no better option than getting someone to write for you. After all, he's already more knowledgeable than you are! Ride on the fur coat of experts in your niche without paying a dime - only if you say the right words Aladdin did with his magic lamp, you will then enjoy having other experts pouring out the content for you without you being one in the process (but the expert status can just rub off on you)! Module #5: Putting Everything Together In this final Module, I recap all the 8 techniques I teach you in the previous Modules. I will be divulging over 6 totally unique ideas that can get you started right away on how to profit from your new found skill to generate content on the fly. And I will also be introducing 5 popular choices to monetizing from content. This is best combo ever... when you acquire the skill to create content on demand and combine it with the ability to monetize from them, you will see your monthly income explode! I'm NOT teaching you how to make an E-Book. I'm going to show you how to get content on demand and do it real fast. It doesn't matter if you're creating an Info Product, writing an article for article marketing, or aspire to run a network of blogs. As long as you're in the business of selling

information, then my course is relevant. "This Will Change The Way You Do Business Online And Add The Zeroes To Your Bottom Line..." Because in the Information Business, Content is King. Content is everything. Content is the hottest selling commodity online. Not web hosting. Not software. It's information. And if you can come up with information to sell on demand - and do it practically overnight - think about: How many articles you can accomplish and send to article directories for back link exposure? How much content can you pump into your blogs and profit from Google AdSense and Affiliate Programs? How many information products can you spawn and make money from? And with quality information spurred on demand, people cannot help but acknowledge you as the expert, the go-to guy. And the irony is, you don't have to start out an expert. In fact, many of the top guns you and I know today (including those names I mentioned just earlier) were just like you and me when they started out. But the difference settled in two different areas, again - QUALITY and VELOCITY. Now you can take full advantage of my course and acquire the skill to spawn QUALITY content at HIGH velocity. You will then separate yourself from the rest of the struggling crowd almost instantly, rival your competitors in creating good content, and if you can do this... how many blogs will you build? How many information products will you make? And how much effect you can expect from article marketing? software, script, php, master resale rights, private labels rights, plr softwares, plr, private label rights, plr content, plr ebook, plr ebooks, ebook, ebook sales, success, business, full master resale rights, resale rights, resale, full master resell rights, master resell rights, resell rights, resell, reseller, resell products online, resell digital product, digital products, digital product, resell ebook, marketing, money, facebook, twitter, page rank, backlinks, get ranked high, google, google page rank, seo, link popularity, php script, scripts, website development, auction software, cgi scripts, domain, download perl, ebay script, financial tools, html tags, perl download, perl script, perl scripts, print html in perl, redirection, usenet gateway, website scripts, perl programming, clickbank, click bank scripts, resale rights scripts, buy scripts, unlock, mrr, mrr pack, reseller ebooks, private label, full private label rights, plr pack, reseller products, resell pack, products to sell, reseller product pack, powerful, spi, perl, cgi, clone scripts, php scripts, css, favicon gen
