"You Owe It To Yourself to Protect Against Viruses, Hard Drive Crashes, & Other Data-Erasing Disasters..." If You Don't Have Backups You Can Lose Irreplacable Data Like Digital Photos, Business Files, Tax Records, and Other Important Digital Information! It's not good enough to make backup copies of important files, you need to place them in a different location than the original files. That way, if your hard drive fails, you can retrieve your important files from a network drive, backup drive, FTP account, or even a web based email account. This software can backup your important files to multiple locations on a given schedule, compress your files, encrypt your files, and restore everything seamlessly! Features: NEW Incremental Backup option and Gmail Compatibility. Backup to a local folder, local drive, LAN, remote share, email address or FTP server. Backup entire drives, folders or individual files. Schedule backups daily, weekly or monthly. Runs silently in Background. Include or exclude certain file types. Compress files using the ZIP format. Encrypt files using blowfish encryption. Rotate backup locations, or backup to many locations or all atonce. Can timestamp backups, allowing you to retain multiple backup versions. Can delete Old backups to conserve space. Works with any FTP account and almost any email account that is compatible with Microsoft Outlook(Including free online email services)
